

IN THE CLAIMS

Please cancel original claims 1-7 and add the following new claims 8-13.

1. – 7. (Canceled)

8. (New) A method of screening, comprising the steps of:

providing a nucleotide sequence consisting of from 23 to 41 continuous nucleotides of

SEQ ID NO.:60 positions 2 to 42;

contacting the nucleotide sequence with a sample;

selecting a compound which binds to the nucleotide sequence.

9. (New) The method of claim 8, wherein the sample comprises a protein.

10. (New) The method of claim 9, wherein the protein is a transcription factor.

11. (New) The method of claim 8, wherein the nucleotide sequence is chosen from SEQ ID NO.:19 and SEQ ID NO.:20.

12. (New) An isolated nucleotide sequence consisting of from 23 to 41 continuous nucleotides of SEQ ID NO.:60 positions 2 to 42.

13. (New) The isolated nucleotide sequence as claimed in claim 11, wherein the sequence is chosen from SEQ ID NO.:19 and SEQ ID NO.:20.
